

## With Track & Trace Reporting: keep track of your shipments at all times

**New!**  
Track & Trace  
Reporting

### Questions?

Reach out for your local customer services or sales representatives.

We are here to help – **no matter what.**

**Track & Trace Reporting** - A new online function launched on Hamburg Süd website. Reports' generation became quicker and easier – at any time.

### “TRACK & TRACE REPORTING”

is a digital application that will make the transport chain even more transparent.

With the type of reports available, you can gather hands-on information based on the shipment, booking and container status. Our “Track & Trace Reporting” includes the function of customizing the reporting fields and time intervals with up to the past three months statistics.

The reports developed are automatically saved and stored, you could review anytime when you login to the platform again and download the data in Excel format (.xlsx) for further analysis.

### No time to manage the reports?

No Problem. You can set and schedule the reports via our system, and the reports will automatically email you the reports at a desired frequency – daily, weekly or monthly.

### How do I start?

Register and login to our website,  
www.hamburgsud-line.com → eCommerce → Track & Trace → Track & Trace Reporting
